Bursting the bubble

- No feedback loop = stagnating
- Stagnating = comfort zone
- Essential to break the silos
- Tech did this with DevOps

How do I do it?

- Seek out different voices
  - Best way to do this: Join a community (open source or otherwise)
- Seek out mentorship
- Continuous learning needs to be a thing
  - Be open to learning along the way & sharing your knowledge!
  - Help others learn!
- Seek out your tribe
  - It takes a whole village!
  - When done right, building a career = building a community can reap amazing benefits
    - Professionally and personally!

Divya_Mohan02

Thank you!
